

Archives Work Write-up and Notes

Note: Any fossils (like crinoids from W.C. Egan) should be flagged as a paleo record and can be sorted out after this project

Step 1: Assembling/Identifying Sources

Part of this was done in the bibliography workflow, where archival materials were looked through and flagged with relevant information. For the rest of this workflow, detailed notes will be used instead of flags to identify potential sources of information related to the malacology collection.

- 1.) Compile a list of names to research and locations of materials. These should include the names searched during the bibliography workflow (and are available in the bib spreadsheet). Also include any individuals who have lots of specimens that you might have left out of the bibliography workflow. Focus especially on people associated with FIC records. Don't forget to include the materials in Sam's office (included Baker Boxes 1 and 2, info on Florida Expedition, the Quadras box, and miscellaneous correspondence related to malacology)
- 2.) Go through archival materials listed in computer and make any notes in this sheet. Keep an eye out for specific catalog or accession numbers, plate numbers, taxa, and localities. The last step of this stage is to go through the miscellaneous correspondence in Sam's office. This step can also involve volunteers. Use William C. Egan entry as a model. For particularly rich sources, the letter with date should be listed, with contents as a subpoint (e.g. L.E. Daniels). Any lengthy inventories of specimens (such as in Quadras Collection) should be listed as "Includes specimen inventory".
 - a. Complete named individuals first (in process), saving the largest (i.e. F.C. Baker) for last. If a person doesn't seem to be listed anywhere, double check larger correspondence boxes like Baker Box 1 (see F.B. Isely as an example), since some individuals may have been overlooked.
 - b. Then go through correspondence related to expeditions (esp. Florida and California) as well as Natural History Survey and any work done with large institutions (esp. Smithsonian, Phil. Acad. Nat. Sci., and Bost. Acad. Sciences, as these have the most FIC's and holes in their data).
- 3.) Once the data is compiled into this sheet, it should be compared to the master malacology data. Some of this archival data may also be listed in publications found in the Bibliography spreadsheet. The goal of this step is to fill in as much data as possible, so be sure to fill in any collector names, dates, and verbatim species/locality info as possible. Three matches in data fields = a confirmed match, while two matched data fields should be matched with caution/are potential matches.
 - a. Sort by donor and then by whatever else you may be looking for. Higher geography was helpful for the few done at this stage. Most of the data found was collecting or received dates.
 - b. Be sure to also compare synonymized taxonomy! Especially for older correspondence, taxonomy will be different.

- **P.P. Carpenter:** Only one notecard referencing a record of the Carpenter Collection. No other records found yet.
 - Green Cabinet
 - 1 Notecard referring to a “Carpenter Collection” in an Academy file in the library
 - L Drive People File
 - No file or finding aid on L Drive
 - Institutional Records
 - No mention of P.P. Carpenter in IR spreadsheet, but there IS a Fairbanks Carpenter. No indications from IR that Fairbanks has any association with malacology or P.P.
 - Archives
 - No boxes found with Carpenter’s name on it
- **William C. Egan:** Some specimens and locations listed in correspondence from archives. Data checked against master spreadsheet on 7/25/2017, no corrections or additions made.
 - People Green Cabinet
 - **Localities:** Bridgeport (IL), Cicero, CB&O R.R. quarry
 - **Species:** *Ichthyocrinus corbis*
 - **Dates:** `1893 (date entire collection was donated to CAS
 - Institutional Records
 - Some mentions of correspondence in IR spreadsheet. No finding aids.
 - Archives: People- Board General Box 1
 - Confirms green cabinet data.
 - A notecard mentions association with Mala #'s 154, 160, 162, 166, 184, 186, 189, 195, 227, 228, 229, 233, 239, 247, 249, 250, 253, 257, 258, 260, 262, 263, 271, 279, 280, 286, 290, 297, 300, 302, 304, 317, 386, and 402
 - Archives: People- Board Higley, William Box 1
 - Mentions CAS publication on Crinoids in its collections (ca. 1906)
 - Letter to Higley describes Egan collection as taking place over many years, in southern Illinois, Ohio, Missouri, and New York, and is approx. 5000 to 8000 specimens.
 - Archives: People- Board Baker, Frank Box 1
 - 1 postcard from Nov. 3rd 1909 mentions a list sent to Egan requesting specimens. Egan writes that he had already sent a box of 60 specimens and will send a box of U.S. corals by Nov. 15th 1909. No further details.
 - L Drive People File
 - No data in People files.
- **B.T. Gault:** Found information in green cabinet. Lots of data found about bird collecting (including inventories), but not much about malacology.
 - Green Cabinet People Files- some data mentioned in articles and obits
 - **Locations:** Glen Ellyn, French Guiana

- **Species:** N/A for malacology specimens
 - L Drive People File
 - Finding Aid Available- Indicates most records are for birds, with some botany and mammals. Series 5 (Box 2) Bird notes may be a source of info, especially for collecting localities. Subseries 3 in Box 1 may also help.
 - Archives: People- Staff Baker, Frank Box 1
 - Mentions only mammals and prairie chicken eggs. No relevant malacology information.
 - Archives: Unit 1 Benjamin Gault Box 2, Series 5
 - No relevant data for malacology specimens
 - Archives: Unit 1 Benjamin Gault Box 1, Subseries 3
 - No relevant data for malacology specimens
- **William Stimpson:** Lost his entire collection in Chicago Fire of 1871. Afterwards collected some specimens from Mexico and Florida. Notebooks mentioned in articles may help in IDs. Species and locality data checked against master spreadsheet on 7/25/2017, no corrections or additions made.
 - Green Cabinet
 - Localities: Mexico, Florida
 - Species: None listed for malacology
 - L Drive People File
 - Finding Aid available: Lists writings which may be useful, despite losing entire collection in 1871 fire. Sources include Series 2 (Box 1) and 4 (Box 2), as well as Addendum Series 1-3 (Box 2). The latter will be the most useful in assessing existing materials.
 - Archives: Unit 4 William Stimpson Box 1 Series 2
 - Biographical notes mention several dredging localities and expeditions, including the North Pacific Expedition (1852-1856), and his final collections in Florida (1871-72) in Portales and the Gulf of Mexico. Also includes a list of published papers and mention of an enumeration of losses after Chicago Fire (in addendum series 3). Also contains transcribed account of North Pacific Expedition, which has some details on taxa collected in China and Japan on pp. 33-39.
 - **Localities:** Eastport, Grand Manan, Newfoundland Banks, Charleston (SC), Japan, Bering Strait, Atlantic Coast, Straits of Seriavine, Hong Kong, Loo Choo, Bonin Islands, Taruga-sima (Japan), Kikaia (Japan), Osima (Japan)
 - Many entries in spreadsheet with Eastport locality have arctos date 1879-03-05, unknown if from Stimpson. One entry with Grand Manan but not from Stimpson. No records with localities Newfoundland Banks, Seriavine, Loo Choo, Bonin, Taruga, Kikaia, or Osima.
 - **Species:** *Lingula pyramidata* (*Glottia pyramidata*), *Arenicola*, Crustacea and Radiata (from Smithsonian), Holothuroidea, Dosis, Ascidis, Acrolodice, Pleophthalmus

- No entries for Lingula/Glottia pyramidata, Arenicola, Radiata from the Smithsonian, Holothuroidea, Dosis, Ascidis, Acrolodice, or Pleophthalmus
 - **Publication:** North Pacific Anthozoa, by Professor Verrill in Proceedings of the Essex Institute
 - **Publication:** “Preliminary Report of the Crustacea dredged in the Gulf Stream in the Straits of Florida by L.F. de Pourtales”, Part 1, Brachyura, Bulletin Museum of Comparative Zoology at Harvard College, vol. 2, p. 109-160
- Archives: Unit 4 William Stimpson Box 2 Series 4
 - Contains a list of specific taxa with page numbers. Unknown what the numbers refer to, but definitely points to an excellent resource.
- Archives Unit 4 William Stimpson Box 2 Addendum Series 1-3
 - Correspondence mentions a “box from Jamaica” sent to Stimpson from Mr. Bland. Unknown if this box contained malacology specimens.
 - **Location:** Jamaica
 - No records in Master Malacology spreadsheet for shells from Mr. Bland from Jamaica
 - Published enumeration of losses after Chicago fire. Gives mention to over 8000 alcoholic specimens collected by Stimpson from the Atlantic coast, as well as his specimens from the Pacific and Pourtales. No further details regarding taxa or collecting numbers.
 - Archives: People- Staff Vasile, Ron Box 3- Biographical Research on William Stimpson
 - No relevant malacology information.
- **Howard N. Lyon**
 - Green Cabinet People Files
 - No information in green cabinet
 - L Drive People Files
 - No finding aid or significant information in L Drive files.
 - Institutional Records
 - No significant data in institutional records spreadsheet. No finding aids
- **R.L. Rea**
 - Green Cabinet People Files
 - No information in green cabinet
 - L Drive People Files
 - No significant information found in L Drive files
 - Institutional Records
 - No significant data in institutional record spreadsheet. No finding aids
- **Florida Expedition, 1877-** Leave until after individual collectors have been completed. See data for William Stimpson, W.W. Calkins, J.W. Velie, and S.H. Peabody
 - Green Cabinet People Files
 - L Drive People Files

- Institutional Records
 - Old CHAS Records Box (Sam's Office)- Florida Expedition, 1877
 - Remarks on the Corals of Florida, by W.W. Calkins
 - Needs transcription.
 - Report on the Florida Expedition of 1875
 - Needs transcription. Brief, undetailed inventory of # of specimens collected.
 - Old CHAS Records Box (Sam's Office)- Selim H. Peabody
 - Contains a notecard with associated MA numbers. Unknown if MA refers to malacology.
- **George H. Laflin**
 - Green Cabinet People Files
 - Only a book of Laflin Genealogy found in file
 - L Drive People Files
 - No finding aid or biography files found
 - Institutional Records
 - No finding aids, 1 mention of correspondence in archives
 - Archives: People- Staff Baker, Frank Box 1- Correspondence with George H. Laflin
 - No relevant malacology data.
- **W.W. Calkins**
 - Green Cabinet People Files
 - Only a card referring to his lichen collection
 - L Drive People Files
 - No file in CAS People folder or significant info in spreadsheet
 - Accessions files
 - Accession 1874.52
 - Inventory of shells presented by W.W. Calkins to CAS in Oct, 1874. Numbered 242-255, with specimen and locality data.
 - Compared with Master Malacology data. Found date data for several records.
 - Institutional Records
 - No significant data in institutional records spreadsheet. No finding aids.
 - Old CHAS History Box (Sam's Office)
 - Letter on Dec 21, 1876 from Chattanooga, TN, written to S.H. Peabody
 - Mentions travel to Lookout Mountain, 3300 feet above sea level. States two species of shells were sent to Peabody, one alcoholic and one (presumably) alive.
 - Not found in master malacology data 07-25-2017
 - Also mentions being in Nashville recently and collecting 140 specimens of genera: Ancylosa, Eurycoelon (?), Pleurocera, and Angitrema

- There are specimens of Pleurocera collected by Calkins in spreadsheet. Unknown if part of this donation, however.
 - Letter on Jan 15, 1877 from St. Augustine, FL
 - Mentions box sent to Peabody containing boots and 112 species of malacology and fish.
 - Letter on Jan 15, 1877 (attached) mentions sending this box to CAS and includes specimen inventory. Mentions box was sent on Jan 13, 1877.
 - Dates updated in Master Spreadsheet [2017-07-25]
 - Letter on Jan 29, 1877 from Cedar Keys, FL
 - Mentions sending a small box of “pottery and a few shells” (likely from mounds, possibly Seminole)
 - Letter on Feb 2, 1877 from Cedar Keys, FL
 - Mentions shell collecting on Pelican Reefs, 4 mi. from Cedar Keys, FL
 - Collected 30 species of shells, but no further detail listed.
 - No records for Pelican Rapids in Master Mala data
 - See also: Entry for Florida Expedition, 1877
- **T. Jensen (is NOT Jens Jensen, who is only associated with botany publications)**
 - Green Cabinet People Files
 - No files in green cabinet
 - L Drive People Files
 - No file in CAS People folder or significant info in spreadsheet
 - Institutional Records
 - No significant data in institutional records spreadsheet. No finding aids.
- **Charles Barney Cory (from Harriet W. Cory)**
 - Green Cabinet People Files
 - Only birds referenced in these files
 - L Drive People Files
 - Only obit info in CAS People folder. No significant malacology info in document.
 - Institutional Records
 - No data in institutional records spreadsheet. Finding aid available.
 - Archives: Unit 1- Charles Barney Cory Boxes 1 and 2
 - Box 1 has mentions of bird collecting in Jamaica, but no malacology data.
 - Box 2 has a notecard from F.H. Baker dated January 25, 1908 mentioning a “box of conchological specimens” for the “curator of the Field Museum of Natural History”. Unknown if this box is now at CAS.
 - **Locations:** Australia
 - **People:** F.H. Baker
 - **Date:** 1908-01-25

- No records in Master Mala sheet for specimens from C.B. Cory from Australia [2017-07-25]

- **James H. Ferriss**

- Green Cabinet People Files
 - No files in green cabinet
- L Drive People Files
 - No data in People files
- Institutional Records
 - 1 mentioned archival record in IR spreadsheet. No finding aids.
- Archives: People- Staff Baker, Frank Box 1
 - Mention of a *Lymnaea stagnalis higleyi* from Douglas Lake
 - There is an *L. stagnalis perampla* from Douglas Lake and Ferriss in Master Mala data, unknown if this is the same one.
 - Mention of clams from W.S. Strode of Lewistown
 - Mention of snail species from Arizona, likely *Lymnaea oreohelix* collected by L.E. Daniels and J.H. Ferriss
 - **Species:** *Lymnaea stagnalis higleyi*, *Lymnaea oreohelix*
 - **People:** W.S. Strode, L.E. Daniels
 - **Locations:** Arizona, Lewistown, Douglas Lake
 - No additional data found for Master Mala Sheet [2017-07-25]

- **Y. Hirase**

- Green Cabinet People Files
 - No mention in green cabinet
- L Drive People Files
 - No data in People files
- Institutional Records
 - No mention in IR spreadsheet, no finding aids. May have info in Pilsbry records. No finding aids.
- Archives: People- Staff Baker, Frank Box 1 Correspondence Pilsbry (Possible source)
 - No mention of Hirase in Pilsbry correspondence

- **Albert E. Scharf**

- Green Cabinet People Files
 - No mention in green cabinet
- L Drive People Files
 - No files in People folder
- Institutional Records
 - No mention in IR spreadsheet. No finding aids.

- **L.E. Daniels**

- Green Cabinet People Files
 - No mention in green cabinet
- L Drive People Files

- No files in People folder
- Institutional Records
 - 2 records mentioning correspondence in archives. No finding aids.
- Archives: People- Staff Baker, Frank Box 1
 - Letter on Sept. 7th mentions small box of shells from Bass Lake, no taxa
 - Two specimens from Bass Lake and Daniels, but unknown if a match
 - Letter on June 28, 1898 mentions small box of live shells, possibly of *L. desidiosa*
 - No matches in Daniels specimens
 - Letter on Sept. 12 1898 mentions small box with 2 *Polygyra* and was likely kept at CAS.
 - No matches in Daniels specimens
 - Letter on Jan. 31, 1899 from La Porte, IN mentions a small box of *Sphaerium*s from Moot's Creek, White Co. IN
 - Date info found and recorded in Master Mala data
 - Letter on May 31, 1899 refers to 1 shell in small tin box, collected from Sarasota, FL in the winter
 - No matches in Daniels specimens
 - Letter on Nov 20, 1899 refers to a small box of shells collected in La Porte, IN and containing three species, two of which are spiraled.
 - No matches in Daniels specimens
 - Letter on Dec. 31 1901 refers to a box of *Sphaerium* and *Physa*
 - No matches in Daniels specimens
 - Letter on Feb. 3, 1902 mentions specimens sent to Baker, possibly *Amnicola limosa* and var. *parva*
 - No matches in Daniels specimens
 - Letter on March 3 1902 refers to a box of shells sent to Baker
 - No matches in Daniels specimens
 - Letter on Nov 11 1902 refers to a small box of shells sent to Baker
 - No matches in Daniels specimens
 - Letter on Dec 1 1902 refers to an ID request for four specimens from Millers, IN (likely of *Cincinnati obtusa*)
 - No matches in Daniels specimens
 - Letter on Dec. 24 1902 requests an ID for specimens of *Pomotiopsis cincinnatensis* and *P. lofidaria*
 - 1 record found for *Pomotiopsis cincinnatensis* from Daniels, date data recorded. No data for *P. lofidaria*.
 - Correspondence in early 1903 contains a list of specimens (I think from CAS?) pictured in plates, as well as the plate numbers.
 - Needs to be compared to Master Mala data
 - Letter on April 28, 1903 mentions 1 specimen of *Conulus chersinus* from a pond near Pine(?).

- Record found in Master Mala data and dates were updated.
- Letter on Jan 10 1905 offers to send several lots of a small *Lymnaea* from a marsh area near Lake James, Steuben Co., IN. Box sent on June 17 1905. Some of these specimens were collected in 1903 and 1904.
 - There are records for *Lymnaea* from Lake James in Daniels records. Unsure if any matches exist to associated date data.
- Letter on April 26th 1905 refers to a few *Vertigo marsei* sent to Baker. Location unknown.
 - There is one record of *Vertigo marsei* in Daniels records, however the date does not match. It may refer to the collecting date and not the received date.
- Letter on Aug. 16th 1905 mentions two cigar boxes of *Lymnaea* from Thief River Falls, Minnesota, some of which may have been in alcohol.
 - Several Daniels records for shells from Thief River Falls, but date on letter does not match date in Mala data. May be a collecting date, not received date.
- Letter on Jan. 9 1906 refers to a box containing 3 *Lymnaea*, possibly *owascoensis*, *taginelliana*, or a new species.
 - No matches in Daniels specimens
- Letter on Jan 28 1906 refers to 2 species of shell: *Ampullaria pinei* and *Purulifera bicornuta* [sic]. Both sent to Baker.
 - 1 record for an *Ampullaria pinea*, date updated in Master Mala data. No records for *Purulifera bicornuta*.
- Letter on March 15 1906 refers to a small box of *Lymnaea*, including an *L. zebra* from "Bailey of N.Y.", and some *Physa*.
 - No matches in Daniels specimens
- Letter on April 24 1906 refers to 1 specimen of *Carychium exile canadense* from Clapp.
 - Record found in Master Mala data and date updated.
- Letter on July 25 1906 refers to some *Lymnaea* and *Physa* from Lake Maxincuckee that may have been sent to and misplaced by Baker.
 - Records of shells from Lake Maxincuckee found and date updated.
- Letter on July 30 1906 refers to a specimen of *Lymnaea* from the Loess of Posey Co., IN. Later identified as *L. coperata* var. *imbelicata*.
 - No Daniels record found for *L. coperata* from Posey Co., IN
- Letter on "Saturday AM" refers to a small box of shell specimens
 - Not enough data to make a match
- Letter on Aug 12 1906 refers to *Lymnaea* from Lake Maxincuckee and in particular an *L. columella*
 - There are *Lymnaea* specimens from Lake Maxincuckee, but no *L. columella*. No matches made.

- Letter on Aug 13 1906 refers to 1 specimen of Amnicola sent to Baker, from Lake Maxinkuckee
 - No Amnicola found from Lake Maxinkuckee.
 - Letter on Dec. 19 1908 refers to Lymnaea recently sent from Camp Colfax.
 - Several records for Lymnaea from Camp Colfax. Unknown if any are matches. No data recorded or changed.
 - Archives: People- Staff Woodruff, Frank Box 1
 - No relevant malacology data in correspondence
- **J.H. Handwerk**
 - Green Cabinet People Files
 - No mention in green cabinet
 - L Drive People Files
 - No files in People folder
 - Institutional Records
 - 1 mention of correspondence in archives. No finding aids.
 - Archives: People- Staff Baker, Frank Box 1
 - Letter on 8/23/1895 refers to a ledge of Ilunten [?] neria [?] 4 miles west of here (Chicago) with many fine specimens of Pentemurous [?] (possibly Pulmonates?)
 - No records found in Master Mala data
 - Other correspondence has illegible references to species, possibly of malacology specimens.
- **Mrs. E.C. Wiswall**
 - Green Cabinet People Files
 - No mention in green cabinet
 - L Drive People Files
 - No files in People folder
 - Institutional Records
 - No mention in IR spreadsheet. No finding aids.
- **A.A. Hinkley**
 - Green Cabinet People Files
 - No mention in green cabinet
 - L Drive People Files
 - No files in People folder. However, see link in F.M. Woodruff People file to find an inventory of specimens collected from Alabama in 1903.
 - Institutional Records
 - 1 mention of archival correspondence in IR spreadsheet. No finding aids.
 - Archives: People- Staff Baker, Frank Box 1
 - Letter on Aug. 13, 1899
 - Possible reference to specimens sent to Baker for his Lymnaea manuscript

- *Lymnaea* from IL listed in letter include *reflexa*, *zebra*, *desidiosa*, *coperata*, *pallid*, *humilis*, *nuttalliana* (from John Wolf of Canton, Ill)
 - Several records of shells from Canton, but none of the listed species or reference to John Wolf or Hinkley
 - Hinkley is associated with a *caperata* and *humilis* from Rockford, IL. Unable to make a definite match with specimens in letter.
- *Physa* listed include *gyrina*, *minosa*, *heterostropha*, *ampullacea*, *plicata*
 - Unable to find record of *Physa* from Hinkley
- Also lists *Bulimus hypnorum* and *Planorbis globatus* and *trivolis*
 - Unable to find records of these shells from Hinkley
- Postcard on February 10, 1906 in DuBois, Illinois
 - Sent to Baker 3 lots of *Somatogyrus tennesseensis*, some mounted on yellow paper. 2 are from the Tennessee River, 10 are from Shoal Creek (see 10 shoal creek in remarks?), 19 from Tombigbee River in Columbus Mississippi
 - Records found for some shells, dates were updated.
- Letter (no date)
 - List of species held by Hinkley which may have been sent to CAS
 - Includes *Planaria bicarinata*, *complanata*, *megostroma*, *exacutus*, *parvus*
 - *Segmentina armigera*
 - *Ancylus rivularis*, *tardus*
 - Mention of *Amnicola* from Rockford, IL and Perry Co. May be *parva* or a new species.
 - Not enough data to add anything to Master Mala data
- Letter on April 22, 1907 from DuBois, IL
 - Mention of *Pachycheilus* sent for illustration, so should have a plate #
 - Also includes other species: *Valvata lineata* (*humeralis pilsbryi*) and an *Englandina* [sic] sent later in the year (no date)
 - *Valvata humeralis* found in Master data and date updated
- Postcard on Sept. 25 1908 from DuBois, IL
 - Mention of a *Physa gyrina* with a flat spine, sent live, sent on Sept. 29th and collected from the "R.R. Reservoir". Likely a locality near DuBois.
 - Not found in master data
 - Also sent with three forms of *Physa* from California.
 - No *physa* for Hinkley found
- Letter from Baker on Nov. 3, 1908
 - ID's *Physa* sent on Sept 29, 1908 as *Physa lordi* (live) and one or two shells from the California lot were taken for the CAS collection.
 - No shells from California associated with Hinkley
- Letter on Nov. 30, 1908

- Offer to sent Baker the soft parts of Pulmonates direct from Mexico starting on Dec. 14th.
 - Baker reply on Dec 2nd asks for “soft parts of everything”, but suggests that the Lymnaea and Planorbis specimens be sent live.
- Letter on Dec. 4 1908
 - Mentions planned localities for collecting in Mexico, including: Tampico, Valles, El Abra, and Tamosopo
- Letter on Feb. 3 1909 from Valles, Mexico
 - Sent Physa, Lymnaea, and Planorbis from Catarnes Lake on Feb. 2 1909
 - 1 record found for Catarnes lake, date updated
 - Also sent Physa, Lymnaea, and Planorbis from the Valles River on Feb. 3rd 1909
 - Many records for shells from Valles river, not enough to ID specifically
- Postcard from San Deguito, Mexico on Feb 15, 1909
 - Mention of two species of Ancyclus collected on Feb. 15 from a small rill
 - No Ancyclus from Mexico found in Master Data
 - Also sent some Physa in alcohol “last Saturday”
- Letter on March 1, 1909
 - Offer to sent Baker all the “Lymnaea, Physa, etc.” from the “Mexico plunder” so that he can take his share (Baker was one of Hinkley’s sponsors for the Mexico Expedition)
 - Letter from Baker on March 2, 1909 denies offer for sent shells, but IDs some of the Mexico shells as Lymanea cubensis
 - There are Hinkley records for Lymnaea cubensis from Mexico, but dates do not seem to line up.
- Letter on Feb. 14, 1911
 - Tells Baker to keep a Pleurobema neglectum from Lake Michigan referred to in a letter from Feb 10, 1911 (not in correspondence file)
 - No Hinkley records for shells from Lake Michigan
- Postcard on April 20, 1911
 - Mentions Physa sent by Hinkley to Baker in 3 lots
 - 2 lots from the Illinois River, Oklahoma
 - 1 lot from Mississippi, collected “in shade of big timber”
 - A letter from Baker on May 16th references “your letter of the 2nd” which may actually refer to these specimens. He IDs the lot from Jackson, Mississippi as “humerosa” and the lot from Oklahoma as “crandalli = rhomboidea”, both species of genus Physa.
- **Edwin A. Woley**
 - Green Cabinet People Files
 - No mention in green cabinet

- L Drive People Files
 - No files in People folder
- Institutional Records
 - No mention in IR spreadsheet, no finding aids.
- **California Expedition??? (Frank Woodruff)**- Leave until after individual collectors have been completed
 - Green Cabinet People Files
 - No mention in green cabinet
 - L Drive People Files
 - No mention in Woodruff's file in People folder
 - Institutional Records
 - Multiple mentions of archival material and correspondence in IR spreadsheet for Frank Woodruff, but none specifically for California.

 - Archives: People- Staff Baker, Frank Box 1
 - Letter on March 13, 1899
 - Mentions small box of shells "I referred to when I was in the city a few days ago"
 - Collected several years ago, very delicate shells and some were crushed. The shells were very very tiny and collected from a moss in a slough
 - 25 specimens sent in cotton
 - Not enough data to match
 - Letter on Jan 11, 1900 from DeKalb, Illinois
 - Mention of collecting from Kishwaukee River, may have been sent to CAS fro ID

- 1 record for specimen of Wabash Pigtoe from Kishwaukee River, no donor listed. Unknown if match can be made to Barber.
- Letter on Jan 18, 1900
 - Sent a large box of Ocean and River shells
- Letter on June 5, 1900 from DeKalb, Illinois
 - Mentions a box of river shells sent to Baker
- Letter on Oct 16, 1900
 - Mentions a box of shells sent to Baker for labeling, possibly the ones sent on June 5
- Letter on May 19, 1902
 - Mentions 4 species needing labels, some specimens from the Sea of Galilee
- Letter on Feb 22, 1904
 - Mentions sending 10 species of shells in a cigar box
 - Mentions collecting at the Clinch River, unknown if specimens sent to CAS
 - Several Barber Unionidae from Clinch River in master data, unknown if these are the same as in correspondence.
- Letter on March 5, 1906
 - Mentions a box of shells left with Baker from “some time ago”
- Letter on Feb 7, 1911
 - Mentions “Sand Shells”, corals, and marine shells collected in Florida sent to Baker for ID
 - A letter sent from Baker on Feb. 20, 1911 says Baker can ID shells at a later date

 - 1 record for correspondence with Frank Baker in IR spreadsheet. No finding aids.
 - Archives: People- Staff Baker, Frank Box 1
 - Letter on July 2, 1906
 - Refers to small Lymneas from Van Heyning, later sent to Baker
 - Letter on July 4, 1909
 - Has a long list of shells ID'd for Baker, including: *Quadrula rubiginosa*, *Q. lachrymose*, *Q. coccinea*, *Q. pustulina*
 - Letter on Oct 31, 1909
 - Mentions a box of *Lymnaea catascopium* from Ottawa sent to Walker with numbers 2539 and 1539. ID'd by Baker on 11/9/1909
 - Letter on Nov 9, 1909
 - Tomahawk Lake specimens sent from Baker to Walker for ID, as well as a *Campeloma* from Gilmore Creek near Wisconsin River. All are from Oneida Co.
- **Charles C. Adams**

 - No mention in IR spreadsheet. No finding aids.
 - Archives: People- Staff Baker, Frank Box 1
 - Letter on Aug 22, 1908
 - Mentions a few shells sent to Baker for ID. "2823" written on bottom of letter in pencil, which probably refers to ACCN 2823, an Isely ACCN #

- Letter on Nov. 3 1908
 - Mentions a small box of shells sent for ID which were collected on August 28 and 29
 - Lists individual specimen numbers (no taxa) and specific localities for some of the numbers. Localities include: Shoofly Creek, Chikaskia River, and Bluff Creek
 - One specimen in lot identified as “calcyculina” by Baker on Nov 19, 1908, and two others as *Quadrula lachrymosa* and *Q. undulate*
 - Letter on May 8, 1909
 - At least three lots of shell species sent to Baker from around Tonkawa, Oklahoma. Specimen numbers are crossed out on letter and are likely already inventoried.
 - Specific localities include “near Tonkawa”; Spring Creek, near Anthony, Kansas; Wild Horse Creek, near Spivey, Kansas; Meridian Creek, near South Haven, Kansas; and Sand Creek, near Argonia, Kansas.
 - All specimens collected in April or first few days in May
 - Letter on July 14, 1909 from Baker
 - Refers to lots or inventory lists sent by Isely on Nov. 3 and Aug. 22. Baker asks for specific localities.
 - Letter on July 18, 1909 from Isely states that the August lot has locality “Chikaskia River, Tonkawa, Oklahoma” and “from a few miles above Tonkawa”. Also states that the Nov. 3rd lot gives numbered specimens more specific localities. Can be treated as an inventory of specimens IF corresponding numbers can be found.
 - Letter on Dec. 4, 1909
 - Sent two species of land snail collected in the woods along Chikaskia River
 - Letter from Baker on Dec. 15, 1909 identifies snails as *Pyramidula alternate* and *Bifidaria contracta*.
 - Mentions Oklahoma collection may have been published in the *Nautilus*.
 - Letter from Baker on Dec. 15, 1909 confirms Oklahoma collection publication in the *Nautilus* (should be in 1909 issue)
 - Letter on July 4, 1910
 - Mentions collecting at the Red River, Oklahoma and offers to send Baker shells for ID
 - Baker accepts offer in letter on July 7, 1910
- **Frank Morley Woodruff**
 - Green Cabinet People Files
 - Mentioned in 1994 biography inventory, has lots of data and correspondence in archive boxes
 - L Drive People Files

- Has short bibliography in People folder, with a link to an article about an Arizona expedition
 - **Localities:** Arizona, Chiricahua Mountains, Huachuca Mountains, Cave Creek Canyon
 - **Species:** Sonorella hachitama, Ashmunella walker, A. levettei, Physa, Oreohelix, et al.
 - **Dates:** 1904
- Institutional Records
 - Multiple records for archival material and correspondence. No finding aids.
- Archives: People- Board Atwood, Wallace Box 1 (correspondence)
 - No relevant malacology data in file
- Archives: People- Board Hills, Charles Box 1 (correspondence)
 - No relevant malacology data in file
- Archives: People- Staff Jones Helen Box 1 (correspondence)
 - No relevant malacology data in file
- Archives: People- Staff Woodruff, Frank Box 1
 - Letter to Frank Collins Baker from Dewing (?), New Mexico. No date
 - Mentions four species of shells sent to Baker, live, with the “big one belonging to Rowley Group”
 - Also mentions sending about 25 “of the others” and around 20 Physa
 - All shells were collected within three days prior to letter in the Florida Range
- Archives: Personnel Box 1- Staff- Individuals- Woodruff, Frank
 - No relevant malacology data in file
- **Frank Collins Baker**
 - Green Cabinet People Files
 - Mentioned in 1994 biography inventory
 - One publication in file in green cabinet, already listed in bibliography
 - L Drive People Files
 - Short bio and long list of publications in Frank Baker folder
 - Institutional Records
 - Multiple mentions of correspondence in IR spreadsheet. No finding aid.
 - Archives: People- Staff Baker, Frank Box 1
 - Correspondence- T. Van Hyning
 - Letter on May 18, 1906
 - Offer to sent Iowa Physae for ID by Baker, possibly also some Lymnaea
 - Letter on June 28, 1906
 - Sent Physa to Walker, but wants Baker to examine some Lymnaea tezewelliana. Sent all specimens to Walker, who then should have sent them to Baker.

- Shells collected “at my own place, on the ground in a slough”
- Letter on Oct 11, 1906
 - Sent a few *Lymnaea coperrata* to Baker
- Correspondence- University of Michigan
 - Letter on March 19, 1910
 - Offer to send publication to U of M in exchange for mollusks of Douglas Lake, Michigan. Letter on 26th accepts offer to exchange. Letter from Baker on Oct 7, 1910 acknowledges receipt of shells
- Educational Collaboration- E.E. Hand
 - Letter on Nov. 16, 1908
 - Mention of a *P. [Physa] lordi* sent to Baker in exchange for books.
 - Letter on June 28, 1909
 - Baker sends two species to Hand: a large *Sphaerium* and a small *Pisidium*
 - Letter on Jan 12, 1910
 - Sends to Baker *Adonax*, *Unio*, and a few white *Unios*
 - Baker letter on Jan 14 returns these shells with IDs. No additional data.
- Educational collaboration- General
 - Letter from Baker to A.H. Conrad on June 2, 1911
 - Mentions that Baker sent him one lot of *B. elevate*
- CAS Collections/Exhibit Correspondence
 - Letter from Otto Hearty on Dec. 7 , 1896
 - Mentions sending fossil Gastropods from Cretaceous limestone of Luggo [?], Rocoder River [?], Wyoming
 - Letter from Oldroyd of Long Beach, CA on Nov 4, 1906
 - Mentions a box of shells sent by Baker and another sent to Baker containing 8 species of West Coast shells
 - Page 2 of a letter (undated) from Oldroyd of Long Beach, CA
 - Mentions sending 200 specimens of West Coast shells
 - Letter from Herbert H. Junitti (?) on Feb. 24, 1907
 - Mentions regret for a smashed box of shells sent to Baker. Offer to replace a *Stenotrema seminuda* from Bangor
 - Mentions 2 lots of cotype *S. seminuda* from Bangor and a single specimen from Calera
 - Letter from William G. Mazyk on Jan 4, 1909
 - Mentions sending Baker 7 or 8 *Unios* from South Carolina, one of which was found 7 miles outside of Charleston.

- Shells received on Jan 8, 1909 and ID'd on March 1, 1909. One was identified as a fine specimen of *Unio merus*
- Letter from T.H. Aldrich on July 19, 1911
 - States that Aldrich collection (by all accounts a very good one for its day) is for sale for \$1500. Unknown if purchased by CAS.
- Correspondence- University of Kansas
 - Letter on March 15, 1909 from G. Dallas Hanna
 - Mentions *Lymnaea*s sent to Baker for ID, plus other shells from Kansas.
 - Hanna also mentions having in his collection *Lymnaea reflexa kirtlandina* from Lawrence and two specimens of *Lymnaea palustris michiganensis* from Kansas City
 - In a letter on March 19, 1909 Baker asks for Hanna's entire collection to identify and check for errors. One of the previously sent lot he identifies as *Lymnaea bulimoides techella*
 - Letter on Dec 30, 1910 from E.C. Johnston
 - ID's 4 shells originally from F.B. Isely (lists his numbered specimens) as *Bifidaria hordeacella*, *B. procera*, *B. procera cristata*, and *Polygyra monodon*. Baker letter on Jan 12, 1911 confirms IDs and returns shells to Johnston.
- Publication Exchange- Field Museum of Natural History
 - Letter on June 3, 1907 from A.W. Slocum
 - Mentions a package of 2 lots of shells sent to Baker for ID
- Archives: People- Staff Baker, Frank Box 2
 - General correspondence
 - List of possible catalog numbers possibly associated with Providence, R.I. and C. Abbott Davis
 - Mention of shell collecting in Tampico, San Luis Potosi in Summer of 1903
 - One letter from Payne (IN Univ.), who sent a "mollusc found in a small pond on the campus [of IU]" for identification. ID'd as *Pisidium abditum*. Unknown if kept or not.
 - Letter from Mary Walker dated Feb. 6 1902 mentions a box of *Limnaea* from around Buffalo, NY sent to Baker. The box supposedly came with a numbered list. The box contained a specimen of *Lymnaea stagnalis* collected at Squaw Island (between Erie Canal and Niagara River).
 - Small note mentioning "large shells" sent to Baker from Mrs. Zech of Long Beach, California on March 28, 1907
 - Exchange of correspondence between Baker and George W.H. Soelner of Washington, D.C. for the identification of his collection, April 8-10, 1911. Includes *Physa gyrina*, *Physa heterostropha*, *Physa ancillaria*, and

a *Planorbis binneyi* (from northern Iowa). Collection should have been sent to CAS on July 1, 1910.

- Identification request from Calvin T. Goodrich of Toledo, Ohio for 8 specimens of *Physa*, dated Jan. 9, 1911. ID'd by Baker on Feb 3rd 1909 as *Physa gyrina*, *Physa gyrina hildrethiana*, *Physa integra*. Specimens were added to CAS collection.
- Postcard from A.H. Conrad, postmarked May 29, 1911. Mentions "a few immature snails" collected in Indiana during a vacation. Asking if they are specimens of *P. elevata* (Say). Response from Baker is unknown.
- Letter from F.A. Sampson (State Historical Society of Missouri) dated 11/4/1911 seeking identification of 25 to 30 lots of *Lymnaea* from Missouri. Baker may have gotten around to these sometime in early 1912. Unknown if kept at CAS.
- Request from F.C. Baker to one Mr. Savage regarding five species of loess shells found in the vicinity of Danville, dated March 18, 1914. These species are mentioned in the Illinois State Geological Survey "University Studies", vol. 3, no. 2 pp. 27. Unknown if sent to CAS.
- Box 2 also contains several Baker publications listed in the bibliography. They are located in the rearmost files and marked with red Post-its.
 - A Catalogue of the Mollusca of Illinois
 - Molluscan Life of the Loess Deposits of Illinois
 - The Molluscan Fauna of Western New York
